# LARGE SCALE STEM CHALLENGES

Our games are likened to large scale STEM challenges. Students are given problems to solve through observation, testing, talking it through and using what's around them. The rooms could use the following elements:

- Science
- Technology
- Enterprise
- Maths
- They also challenge multiple senses (Sight, Sound, Smell, Touch)

Escape Rooms are a unique way of providing hands on experience and give students the opportunity to apply their classroom learning to an outside situation. To be successful at an escape room challenge students must work together as a team ...the puzzles cannot be solved alone.

A group of four students are gathered around a table in a dimly lit room, likely an escape room. They are looking at a large sheet of paper or a puzzle. A young man in a dark sweater is pointing at something on the paper, while a young woman in a striped shirt looks on with a smile. In the background, another student is visible, looking at a piece of paper. The atmosphere is one of collaborative problem-solving.

# TESTIMONIALS

*“Several years ago I created a new course for our PEAC (Primary Extension and Challenge) program. Inspired by my engineering son, I called it Break Out and it was based on escape rooms. It is THE most popular course because we go to Escape Hunt. Escape Hunt offers a variety of rooms that are suitable for almost any age (my students are Years 5/6) and the kids absolutely adore it. Amber and her team are so welcoming, are willing to adjust to my constraints and to make the most fabulous learning and challenging environment for everyone. The kids come away absolutely mind blown! A brilliant excursion!”*

**Mrs D - PEAC Teacher South Metro**
