With no chance of victory, you and your scurvy shipmates decide to jump ship – after helping yourself to the contents of Blackbeard's legendary treasure chest.

You've broken into his cabin to grab all you can, but now the door has jammed shut and you've just 60 minutes to escape; any longer and you'll drown – if the sharks don't get you first.

Step on board a doomed spaceship, where a rogue Dalek has tapped into the power system, in an attempt to recharge its weapons. Should the Doctor's most feared enemy be successful, it will exterminate all in its path.

You the Doctor's friends, must prevent this catastrophe. Shutting down the ship's power core will ensure the Dalek cannot activate its weapons. However, the ship's life support systems rely on the same energy source, meaning that shutting down the power would result in the death of all 10,000 passengers.

You have just 60 minutes to find a way out of this impossible situation. You must defeat the Dalek to allow the spaceship to continue safely on its journey. Take too long and your destination will be extermination!

Step into a mysterious cave where you believe a magical and powerful lamp is hidden within. You and your team are prepared to risk anything to retrieve it.

To gain entry to the cave, you have enlisted the help of a local sorcerer. Upon his command of 'Open Sesame' the great cave door rolls back. Once inside, your eyes adjust to the dim light and you realise that the cave is full of puzzles and quests designed to guard the treasure hoarded within.

Navigate your way through the mysterious cave and seek out the lamp. But be warned – legend states that those who remove the lamp risk the cave's wrath and could remain trapped for eternity.
